Remax-1318 rotary type cnc router quotation

picture for reference

Remax-1318 Main technical parameters:

- 1.1300*1800*200mm, steel structure
- 2.rotary axis diameter:100mm, length 1500mm *4
- 3.2.2kw water cooling spindle*4, DSP A18 controller
- 4.stepper motor and leadshine driver, fuling inverter
- 5.25 hiwin square rail, TBI screw Z axis, rack transmission
- 6.tool sensor, manual oil system, ORMON limit
- 7.3.0kw dust collector two bags
- 8.artcam or type3 software, Schneider parts

Application:

This cnc machine mainly used for engraving and cutting wood, PVC, MDF. also can do some Stone, Brass and AL Processing, mold manufacturing, wood processing, craft manufacturing, indoor decoration cutting, sign and mark manufacturing, acrylic board processing, metal and PCB drilling.

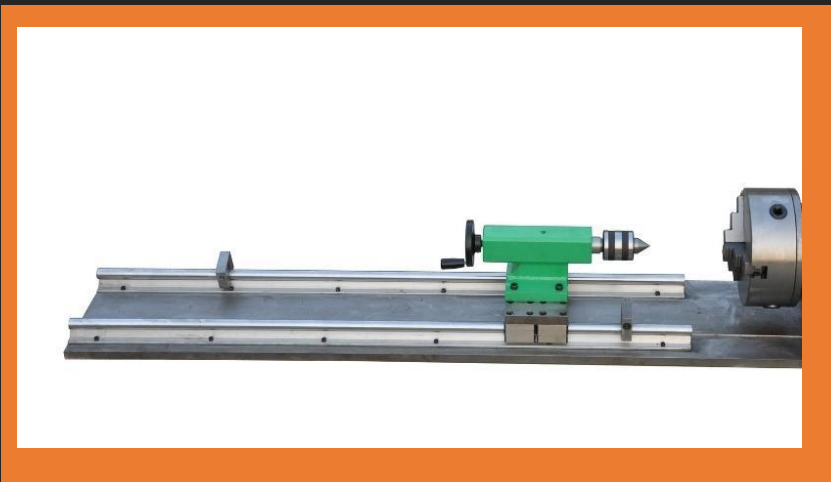

Parameters:	
1300x1800*200mm	Work dimensions
6000mm/min	Max. Speed
0-4000mm/min	Working speed
0.01mm	Mechanical precision
artcam software	Software
AC380V/50HZ/60hz	Working voltage
stepper motor and driver	Drive type
0-18000rpm	Spindle speed
1-32mm	Blade diameter
DSP control system	Control system
HPGL.G code, u00, uug, plt	Command
With	Lubrication
With	Tool height measurement
High soft specially for Numerical Control(4x0.75)	Motor wire
Shielding high soft (3*1.5)	Spindle wire
G code, *uoo, *mmg, *plt	Dictate Format
Artcam , Ucancam, Type 3	Software when delivery
0-45 °C	Work environment temperature
30%-75%	Relative humidity
CE, ISO, BV	Certificate
0-18m/min	Engraving speed
0.02mm	Machine accuracy
0.0254mm	Resetting accuracy
